## Summary

I am a dedicated third-year undergraduate student specializing in Artificial Intelligence and Data Science (AIDS) with a strong foundation in Data Structures, Algorithms, and Machine Learning. My academic journey and projects have equipped me with proficiency in programming languages like Python, C and C++. I am passionate about solving real-world problems using AI-driven solutions.

Academic and Project Highlights :

- 1) Designed an IoT-based Smart Parking System for optimizing urban parking efficiency.
- 2) Developed predictive models for diseases like heart disease and Alzheimer disease using Random Forest Support Vector Machine and Decision Trees.
- 3) Integrated Generative AI in Market Trend analysis and Consumer Insights for Herbal Cosmetics.
